

# Gaurav Katkar

Senior AI Engineer | GenAI & RAG Systems | Full Stack Developer

Pune, India · +91 9604499373 · [gauravkatkar1000@gmail.com](mailto:gauravkatkar1000@gmail.com) · [gauravkatkar1000.vercel.app](https://gauravkatkar1000.vercel.app) · [linkedin.com/in/gauravkatkar1000](https://linkedin.com/in/gauravkatkar1000)

## PROFILE

AI Engineer and Full-Stack Developer with 4+ years of experience building production-grade GenAI systems. Designed and deployed RAG platforms, recruitment intelligence pipelines, pricing recommendation engines, and multi-agent workflows using Anthropic Claude, AWS, Ruby on Rails, Flutter, and Angular. Strong focus on translating business problems into scalable AI solutions — starts from the problem, not the technology.

## SKILLS

|                   |                                                                                                                               |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------|
| AI & LLM          | Anthropic Claude API · Prompt Engineering · Multi-Agent Systems · LLM Orchestration · Structured Outputs                      |
| AI Architecture   | RAG Pipelines (AWS) · Vector Databases · Amazon Titan Embeddings v2 · Semantic Search · Semantic Chunking · Vector Embeddings |
| Backend           | Ruby on Rails · Python · REST APIs                                                                                            |
| Frontend & Mobile | Angular · Flutter / Dart · Firebase · Riverpod                                                                                |
| Engineering       | AWS · CI/CD Pipelines · Clean Architecture · SOLID Principles                                                                 |

## EXPERIENCE

### Senior Full Stack & AI Developer

Jul 2021 – Present

Jombay · Pune, India · 4+ years

#### AI SYSTEMS

- Architected a **semantic search system over 200+ enterprise knowledge documents** using retrieval augmented generation on AWS (Amazon Titan Embedding v2 + Anthropic Claude API) — multi-dimensional confidence scoring across 4 dimensions and 6-tier fallback logic, **reducing knowledge lookup time from minutes to seconds and achieving 90%+ answer relevance in internal testing**
- Built an **AI-powered pricing recommendation system** trained on 3 years of historical engagement data — surfaces comparable reference points for new proposals automatically, **reducing proposal preparation time by ~60% and improving pricing consistency across teams**, with edge case detection when historical coverage is insufficient
- Designed an **end-to-end recruitment intelligence pipeline**: JD parsing → competency framework and rubric generation → resume ingestion → personalised AI interview question generation → async video interviews → transcript scoring → candidate fit recommendation, **replacing a previously manual multi-stage process**
- Built **multi-agent AI workflows** using planner-executor architecture, tool calling, retrieval agents, and structured output validation — applied prompt engineering to enforce strict JSON schemas and semantic chunking strategies for downstream reliability

- Owned full integration of all AI systems with **Ruby on Rails backend APIs and Angular frontend** — end-to-end ownership from LLM orchestration layer through to production deployment

#### MOBILE & FULL STACK

- Built and deployed **two cross-platform enterprise applications** (Android, iOS, Web) from scratch using Flutter — 50+ screens, Clean Architecture, CI/CD, and Riverpod state management
- Developed **8+ secure assessment modules** including live proctoring with face detection, Zoom Video SDK integration, Firebase Auth with JWT, and offline-first Realm caching with real-time sync

#### PROJECTS

---

##### 01 Intelligent Knowledge Retrieval Engine

Production semantic search system over 200+ enterprise knowledge documents. Multi-dimensional confidence scoring and 6-tier fallback logic ensure results always return — even for edge case queries.

RAG on AWS · Amazon Titan v2 · Anthropic Claude · Ruby on Rails · Angular · Vector Embeddings

##### 02 AI Pricing Intelligence System

Trained on 3 years of historical engagement data to surface comparable reference points for new proposals. Flags gaps in historical coverage automatically.

Python · Ruby on Rails · LLM · Pattern Matching · Data Analysis

##### 03 Recruitment Intelligence Pipeline

JD parsing → rubric generation → resume ingestion → AI interview questions → async video → transcript scoring → fit recommendation. Each layer independently testable in production.

Anthropic Claude · Python · Flutter · Prompt Engineering · Ruby on Rails

##### 04 AI Knowledge Base LIVE

Publicly accessible RAG chatbot — ask it anything about AI, LLMs, or transformers. Retrieves context from 7 knowledge sources and synthesises cited answers via Groq LLaMA 3.3 70B.

Groq LLaMA 3.3 70B · Sentence Transformers · Streamlit
